

Envipco Holding NV

Envipco is an experienced global developer and manufacturer of RVM's (Reverse Vending Machines) and has experience in setting up new DRS (Deposit Return Schema Solution) systems in several countries. Many of our employees have been in the RVM business for over 25 years and have been personally involved in designing and setting up DRS systems in both European and North American territories.

Installation and service

Envipco will be the supplier of all hardware, including the Reverse Vending Machines and spare parts and all the needed software and updates. Envipco will plan, install, and commission the RVM's. After installation, Envipco will take care of training of the users, the preventive and curative maintenance during the time of the contract and the needed documentation. RVM's will be connected to the "Envipco Envision" web portal (ePortal) for real-time monitoring of the RVM's.

Envipco's work excludes:

- The preparation of the location for the RVM's
- Any needed authority permits for placing an RVM or kiosk if needed; any construction work, power supply, data supply or any other preparation work needed for machines and/or kiosks placing; development of specific interfaces etc..
